¹ Accessory shift buttons are optional for drop handlebar controls.

² One pair of shift buttons must be used with the BlipBox.

Red Shaded Model Codes: AXS® Controllers that can be used as a replacement controller with a SRAM RED eTap 11 Speed front and rear derailleur when firmware, 2.29.4 or later, is installed. Use the SRAM AXS App to update firmware to 2.29.4 or later on the AXS Controllers, then pair the system. Consult the SRAM RED eTap Systems user manual at www.sram.com/service for System Pairing.

Note: The SRAM RED eTap 11 Speed front and rear derailleur will not be visible in the SRAM AXS App, require a firmware update, or have the full AXS system configuration benefits.
